

Title

SRN : PES1PG25CA292

Name: MAHIMA P

Project Domain: Environment & Climate

Goal: SDG 12 - Responsible Consumption and Production

Problem Statement:

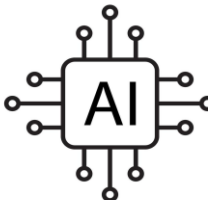

Fast fashion brands contribute heavily to:

- Carbon emissions
- Water waste
- Textile pollution

Consumers lack awareness about: Which brands are environmentally harmful

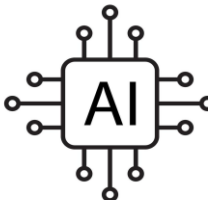

Objective:

- Predict environmental impact of fashion brands
- Suggest sustainable alternatives

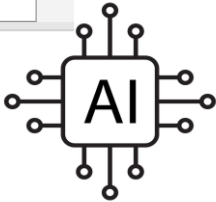

- Source URL: <https://www.kaggle.com/datasets/waqi786/sustainable-fashion-eco-friendly-trends>
- Dataset Name: **Sustainable Fashion: Eco-Friendly Trends**
- Size / Shape: (5001,15)
- Simple description about the dataset: This dataset contains information about different fashion brands and their environmental impact. It includes details such as the type of materials used, sustainability ratings, carbon footprint, water usage, waste production, and whether the brand follows eco-friendly practices like recycling and certifications.

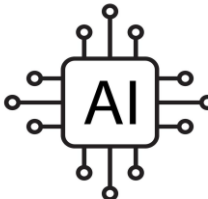

The dataset is used to analyze and predict how much a fashion brand affects the environment and to promote sustainable fashion choices.
